		ument D2, which is considered the prior art	
		sest to the subject matter of claim 1, closes (the references between parentheses	
		er to that document) a cooking appliance	
		prising a cooking chamber (5) and a lighting	

International application No.
PCT/EP2004/004327

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

arrangement (3) for illuminating the cooking chamber, said lighting arrangement comprising a reflector (8) with (at least) a first reflector surface (9) which reflects the light from a light source (4) of the lighting arrangement as diffuse scattered light into the cooking chamber, the reflector having (at least) a second transverse reflector surface (9') which is arranged transversely to the (at least one) first reflector surface, said second reflector surface reflecting the light from the light source into the cooking chamber in a bundled manner, the (at least one) first reflector surface being curved in the manner of a groove.

The cooking appliance according to claim 1 differs from the cooking appliance disclosed by document D2 in that the front ends of the at least one first reflector surface which is curved in the manner of a groove are closed by the second transverse reflector surfaces.

The objective problem intended to be solved by the invention can be considered that of reducing depreciation of the light when it is reflected by the reflector.

Since the proposed solution to that problem is not suggested even by a combination of available prior art documents, the subject matter of the invention as per claim 1 can be considered novel and inventive (PCT Article 33(2) and (3)).

International application No.
PCT/EP2004/004327

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

DEPENDENT CLAIMS 2-5, 7-8, 10-21:

Since the subject matter of claim 1 is considered novel and inventive, the subject matter of dependent claims 2-5, 7-8 and 10-21 is also considered novel and inventive.

The invention is clearly industrially applicable.

International application No.
PCT/EP2004/004327

Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

The two-part form of claim 1 should have been brought into line with the disclosure of document D2.

Contrary to PCT Rule 5.1(a)(ii), the description does not cite documents D1-D4 or indicate the relevant prior art disclosed therein.

Box No. VIII	Certain observations on the international application	
The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:		
	Claims 6 and 9 should have been deleted (see also	
	Box III).
